Analysis Results

Predicted Event: roadaccidents

Confidence: 95.00%

Event Summary: The surveillance footage appears to depict a series of near-misses and a significant accident involving pedestrians and vehicles. A dark-colored car speeds down a city street, nearly striking pedestrians. A police car responds rapidly to an unspecified incident, potentially related to these near-misses. The main event, however, seems to be a bus accident where the bus lost control, colliding with a bus stop, causing injuries and scattering pedestrians.

Detected Events

Event	Start Time (s)	End Time (s)	Start Frame	End Frame
Event 1	0.07	1.10	2	33
