General Information

Analyzed on: May 06, 2025 at 11:58 AM

Video Duration: 11.57 seconds

Analysis Results

Predicted Event: roadaccidents

Confidence: 95.00%

Event Summary: A surveillance video captured a series of escalating events on a busy city street. It began with a police car responding to an incident near a pedestrian walkway. A subsequent blurry image suggests a bus veered off course, nearly striking pedestrians. This culminated in a bus crashing into a crowd of pedestrians at a bus stop. Before the crash, the video also showed a person falling on the sidewalk, though whether this was related to the bus incident remains unclear.

Detected Events

Event	Start Time (s)	End Time (s)	Start Frame	End Frame
Event 1	0.17	1.20	5	36
Event 2	1.33	2.37	40	71
Event 3	2.50	3.53	75	106
Event 4	3.67	4.70	110	141
