

EchoLens Video Analysis Report

General Information

Analyzed on: April 26, 2025 at 01:16 AM

Video Duration: 11.57 seconds

Analysis Results

Predicted Event: roadaccidents

Confidence: 61.65%

Event Summary: A surveillance video captures a series of events culminating in a bus crashing into a crowd of pedestrians on a city street. Prior frames show a police car seemingly responding to an incident further down the road, and a pedestrian walking normally before the bus mounts the curb and strikes the pedestrians.

Detected Events

Event	Start Time (s)	End Time (s)	Start Frame	End Frame
Event 1	0.17	1.20	5	36
Event 2	1.33	2.37	40	71
Event 3	2.50	3.53	75	106
Event 4	3.67	4.70	110	141
Event 5	4.83	5.87	145	176
