Video Duration: -9223372036854776.00 seconds

Analysis Results

Predicted Event: normal

Confidence: 95.00%

Event Summary: The surveillance footage shows a large group of people densely packed together in an indoor hallway or lobby. The images are often blurry and the lighting is poor, making it difficult to definitively determine the nature of the gathering. While some descriptions suggest possible agitation or a confrontation, others indicate the crowd may simply be milling about, waiting, or reacting to something outside the camera's view. The absence of clear evidence prevents a conclusive determination of whether a fight or other significant incident occurred.
