EchoLens Video Analysis Report

General Information

Analyzed on: April 30, 2025 at 07:41 PM

Video Duration: 11.57 seconds

Analysis Results

Predicted Event: roadaccidents

Confidence: 95.00%

Event Summary: The surveillance video captures several near-misses and one serious incident on a city street. It begins with seemingly normal pedestrian and vehicular traffic, then shows a police car possibly responding to a situation. Subsequently, a near-collision occurs between a pedestrian and a turning car, followed by a bus dangerously approaching pedestrians and culminating in a bus crashing into a bus stop, resulting in potential injuries and significant disruption.
