Analysis Results

Predicted Event: roadaccidents

Confidence: 95.00%

Event Summary: The surveillance footage depicts a series of escalating events on a city street. It begins with seemingly normal pedestrian and vehicular traffic. However, a dark-colored car speeds dangerously close to pedestrians, followed by a larger vehicle (possibly a bus) losing control, resulting in a crash into a bus stop and the subsequent collision with pedestrians and other vehicles at an intersection. The severity of the situation escalated rapidly from near-misses to a major accident involving multiple casualties.

Detected Events

Event	Start Time (s)	End Time (s)	Start Frame	End Frame
Event 1	0.07	1.10	2	33
Event 2	1.13	2.17	34	65
Event 3	2.20	3.23	66	97
Event 4	3.27	4.30	98	129
Event 5	4.33	5.37	130	161
Event 6	5.40	6.43	162	193
Event 7	6.47	7.50	194	225
Event 8	7.53	9.10	226	273
